Data output via USB flash memory without PC

The cutting data designed with Cutting Master 4 or Graphtec Pro Studio / Plus can be output directly to the cutting plotter by saving to USB flash memory and plugging in. This simplified work-flow enables users to operate without a computer.

* The USB memory format only supports FAT32. Please note that NTFS and exFAT are not supported.

【Carrier Sheet Table】

It is an optional item that can be attached to the front and back of the cutting plotter to support a carrier sheet.

* Available with CE7000-40 / -60.
* In case that using carrier sheet "CR09300-A3", Please use together with carrier sheet table "OPH-A45".

ARMS 8.0

The Advanced Registration Mark Sensing system delivers precise Print & Cut results by using sensors to detect registration marks. Countless efficiency boosting features improve productivity for Print & Cut applications such as stickers and decals. For more info...

Data Link Function (Barcode Data Management/Continuous Cutting)

By reading the Graphtec original Barcode, CE7000 automatically detects its linked data from PC or USB flash memory. This function is available regardless of which printer or RIP software is used.

* The USB memory format only supports FAT32. Please note that NTFS and exFAT are not supported.

Continuous Cut (Data Link function)

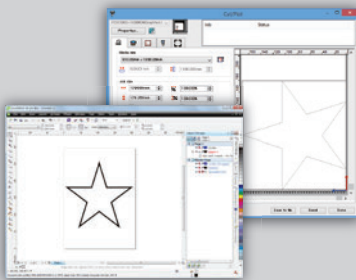

Barcode data management allows cutting different data sequentially by detecting the "Start Mark" of the new Barcode. Sequential Print & Cut process with roll-media is now available.
